Abstract

B *I* x^2 x_z 

Cardiovascular disease is still a major global health problem. Hypertension is the most risk factor for the incidence of cardiovascular disease and increases the risk of death. Primary and secondary prevention efforts are needed by increasing patient awareness of identifying risk factors and carrying out preventive management. "Electronic-Tindak lanjut Tensiku", known as e-TITENKU, is a web and smartphone-based application designed to manage coronary heart disease prevention in patients with hypertension. The purpose of this study was to determine the effect of the e-TITENKU intervention model on knowledge of coronary heart disease prevention. This research design is true experiment pre and post control group design. The sample size is 120 respondents with primary hypertension in

LETTER OF ACCEPTANCE

Dear authors,

It's my pleasure to inform you that, after the peer review, your paper,

Article title: **The Effect of Electronic Tindak lanjut Tensiku (E-Titenku) Model to Knowledge of Coronary Heart Disease Prevention**

Article Reference Number: **JNP_380_2023**

All Authors: **Sidik Awaludin, Galih Noor Alivian, Aprilia Kartikasari, Dwi Novitasari**

Corresponding Authors: **Sidik Awaludin** (abifayza@yahoo.co.id)

Was reviewed by reviewer and got positive opinion. This, paper has been **ACCEPTED** for publication at the peer-reviewed "Journal Of Nursing Practice" (JNP) to be published in April 2023 (Vol. 6, No. 2).

Thank you for working with "Journal Of Nursing Practice" (JNP). Please do not hesitate to contact us if you have any further questions.

Sincerely,

Prima Dewi Kusumawati,
