Reviewer Comments:

some things need improvement:

1. the LC 50 value in the abstract of the hexane fraction of *Z. zerumbet* species does not match the data in table 1
2. conclusions shown are not the same as those in the abstract.
conclusion adapted to the abstract.
3. conclusions did not consistently show the value of LC 50 from two different species and did not consistently show the value of LC 50 from two different species.
4. Information on secondary metabolite content in conclusion, it is better if it is shown the secondary metabolite content of each fraction for both plant species
