Sarmoko Sarmoko, Iin Solihati, Joko Setyono, Heny Ekowati:

We have reached a decision regarding your submission to Indonesian Journal of Pharmacy, "RED GINGER EXTRACTS INCREASE THE CYTOTOXIC ACTIVITY OF 5-FLUOROURACIL IN COLON ADENOCARCINOMA WIDR CELLS".

Our decision is: **Resubmit for Review**

Editorial Board IJP
Indonesian Journal of Pharmacy
mfi@ugm.ac.id

Reviewer A:Recommendation: **Resubmit for Review**
-----**Comments**

The manuscript explores the potency of red ginger in combination with 5-FU in colon cancer. However, more analysis of the results should be done to clarify the effect of the combination (addition or synergy), for example with a combination index analysis.

The manuscript needs language editing

In the abstract: Why did the authors choose this concentration and how long did the treatment conduct?

Authors should clarify how did they choose the concentration (was it 1/2 IC50? Or something else).

I write other comments on the draft

Reasons

More analysis of the results should be done, so it needs to be reviewed again after the authors provide the analysis.
