## Welcoming Speech

On behalf of the organizing committee of 10<sup>th</sup> PITO, it is a great pleasure to welcome all of you in Surabaya. This event is an Indonesian Annual Otolaryngology Scientific Meeting which will be held on November 26<sup>th</sup>-28<sup>th</sup>, at the JW Marriott Hotel Surabaya. I would like to inform that this occasion we have a theme: **OTOLOGY UPDATE: "FROM BASIC SCIENCE TO CLINICAL PRACTISE"**.

There will be many interesting topics we will discuss, especially on the basics of otology science and the following applications at clinical practice. The scientific program will consist of special lectures, plenaries, symposium, workshop, and instructional courses on otology, neurootology, and community-ENT which will be delivered by local and foreign speakers; and also free paper competition for ORL-HNS residents as the encouragement to young doctors to upgrade their competency.

Temporal bone dissection (TBD) in conjunction with live demo and workshop of vestibular will take place at pre congress. A detail scientific program is in progress and will be coming soon. The website we built is going to be regularly updated until the date of event, and hopefully it will provide you with most and actual information.

Surabaya as the second biggest city in Indonesia is well known by it's good city design and supported by several facilities necessary to the civilisation and also so many the delight full cuisines must try. Finally, our sincerest hope that this congress will bring us together to share in common goal of advancing and developing the field of otology.

## Welcoming Speech

Assalamualaikum Wr. Wb

Ear diseases are still the main health problem in Indonesia that has been the most discussed issue in Indonesia Otolaryngology Study Group. This condition due to multi factors component such as social economy, education, and knowledge and skill of ENT specialists in ear diseases management. Up to now, only less than 20% of ENT specialists in Indonesia has capability of middle ear surgery at advance stage.

Otolaryngology study group has been more than 30 temporal dissection course training and have established this training as requirement that should be undertaken by ENT residents during their study. In the implementation of this effort, in the PITO X we will also organize a temporal bone dissection course and otology office procedure course. The purpose of this training is to enhance the ability of our otorhinolaryngologist in term of basic up to advance skill that can be applied in daily practice.

There will be also Hearing International meeting seminar as a pre congress event. In this event, all participants of PITO X are welcome to have additional information and update in ear and balance diseases. The PITO X will be attended by several world class speaker from overseas.

At last, I would like to extend my gratitude and appreciation to organizing committee of ENT department, Dr. Soetomo Hospital/Faculty of Medicine Airlangga University, all local and overseas speakers, and all participants

Wassalamualaikum Wr. Wb

## Welcoming Speech

Assalamualaikum Wr. Wb.

All thanks to Allah SWT, that we can gather in 10<sup>th</sup> Indonesian Annual Otolaryngology Scientific Meeting in Surabaya. This event is held by Indonesian ENT-Head and Neck Association, Otolaryngology Study Group Perhati-KL, in collaboration with Perhati-KL North Java Branch and ENT-HNS Departement, Faculty of Medicine Airlangga University, Dr. Soetomo Hospital.

This scientific meeting is tool of transferring knowledge and skill, especially in the field of Otolaryngology. We should be aware that the public expectations of health care are getting higher, especially in Ear Nose Throat-Head and Neck health services. Furthermore, the change by government in National Insurance Policy for the public. BPJS also has an impact in ENT-HNS health service system.

With this era, not only that doctors involved in quality control of health services, but they also have to be cost-conscious so that service provided refers to the quality of service and cost control.

This PITO X event is expected to present a variety of scientific topics, and also to provide various workshop. Such as Temporal Bone Dissection, Basic and Advanced level, and operating demonstration. In this occasion, the presentation of the material will be presented by national and international speaker.

To all national and international speakers, I thank you for the contribution given and to all participants, welcome to PITO X Surabaya.

Wassalamualaikum Wr. Wb.
