Reviewer A: Dear Authors, Thank you for submitting this interesting paper to Biodiversitas. This paper describes the diversity of the wild bees in environments with honey bees and four different crop species. I found your paper to be particularly interesting and useful, as it has relevance for both those in farming and also in conservation. There are however many revisions required to make sure that the paper is useable by other researchers. I have attached a file with comments attached, please ensure these are addressed when making revisions. It is a good idea to use highlighted text to show where any edits are made. Additionally, please see the following comments:
