Yugi R Ahadiyat:

We have reached a decision regarding your submission to International Journal on Advanced Science, Engineering and Information Technology, "Upland Rice Performance Through N, P, K Fertilizers and Weed (Mimosa invisa L.) Extract Applications".

Our decision is to: Revision Required

Please update your abstract into 220-250 words and your reference 70% in (2017-2021) from journal indexed by Scopus. Citation and Reference in Paper must using Mendeley with IEEE Style.

Please submit your revision (Template IJASEIT 2021) in 10 days. More than 10 days of paper will be rejected from the system. Re-upload your revision into journal system NOT via email.

Reviewer A:

this paper has novelty and contribution, but some writings still ineffectively and in-efficient. Reduce your point in this research with a figure to interpretation your result. Please revise your figure with the best quality image, and make the table properly, see the template.

Editor

Reviewer A:

Gap analysis needs to be noted, the interaction aspects of N, P, K in weed extract. Microscopic studies can also be interesting and new if they can be added, for example how the elements or molecular interactions cause changes in the results. Related research studies can be accessed and referred to as novelty in the introduction. In the method, use a flow chart to make the stages of the research easy to understand and interesting. Visual weed extract data is needed to determine the interaction process that occurs with N, P, K with different doses.

Yugi R Ahadiyat:

Thank you for submitting the manuscript, "Upland Rice Performance Through N, P, K Fertilizers and Weed (Mimosa invisa L.) Extract Applications" to International Journal on Advanced Science, Engineering and Information Technology. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Reviewer A:

This paper already has novelty and good contributions in accordance with existing research objectives. Abstract writing is correct and provides good information about the research objectives, the methods used and the research results. The writing is in accordance with the provisions, namely the maximum number of words is 250 words. The introduction is good with a clear background and has a strong gap in analysis. The introduction has also contained the latest research and good contributions in accordance with the objectives of the research being studied. The research method is clear and systematic, with systematic stages and has a good flow chart. The discussion is good and already has clear and complete arguments with arguments that refer to relevant and current journals. The making of figures and tables is in accordance with the 2021 template. The conclusions are good and clear, and are in accordance with the objectives. Reference is relevant and precise and in accordance with the main study of research.
