Dear Sehah Sehah,

This is to confirm that the manuscript, "Application of 1D-Electrical Resistivity Method in Designing Aquifer Model in the Banks of the Serayu River, Sokawera, Somagede, Banyumas, Indonesia" (MSID:15192), has been received for consideration in the Journal of Mathematical and Fundamental Sciences.

We will first check your submission based on the Author Guideline such as forms completeness (Submission form and Authorship Statement), then plagiarism checks will commence before it will be reviewed by peer reviewers. The incomplete submissions will be returned to authors, without any review process, that does not adhere to the guidelines. You should check the submission files status by login to your account.

If the upload files are failed, you should send a reply to this email and attach all the required files.

For your information, the author whose paper is accepted for publication in Journal of Mathematical and Fundamental Sciences is subjected to pay USD 150 per article up to 15 pages.

You will be able to check on the progress of your manuscript by logging on to the ITB Journal Online System: <http://journals.itb.ac.id/index.php/jmfs>

Dear Sehah Sehah, Hartono, Zaroh Irayani, Urip Nurwijayanto Prabowo,

We have reached a decision regarding your submission to Journal of Mathematical and Fundamental Sciences, "Application of 1D-Electrical Resistivity Method in Designing Aquifer Model in the Banks of the Serayu River, Sokawera, Somagede, Banyumas, Indonesia" (MSID:15192).

Our decision is: Revision Required.

If you are able to correct the manuscript and taking into account all of the points raised in the referees' report, I would be willing to arrange for the paper to be reviewed again. Revisions should be submitted within 21 days, or before 25-08-2021.

Besides the referee's report, see also the Reviewer Uploaded Files to read the additional comments from reviewers (files attached).

When submitting the revised manuscript, please employ our [Author's Response Form](#) to addresses the issues raised in the reviewer's comments, point by point. You should also include a suitable rebuttal to any specific request for change that has not been made. To assist the review process, it is essential that all corrections made to the text (in response to both the Editor's and the reviewer's comments) are highlighted in yellow.

Manuscript URL: <https://journals.itb.ac.id/index.php/jmfs/authorDashboard/submission/15192>

The revised article should be submitted on ITB Journal's online system on the "Revision" tab. You can click on the "Upload File" button to upload the revised manuscript.

If you have any comments regarding the review process, please add a new discussion on the "Review Discussion" tab.

If you do not know or forget your username and password for the journal's website, you can use this link to reset your password <https://journals.itb.ac.id/index.php/jmfs/login/lostPassword>. Please make sure to input your registered email.

Comments to Author:

1. The method has not explained the survey design, how many sounding points and the reasons, configuration, and equipment used
 2. Why are measurements taken at a location close to the meander? why is the trajectory almost perpendicular? why not conduct a survey parallel to the direction of the river trajectory towards Sch-6 and Sch-7 to prove it is not intruded by river water?
 3. The marine sedimentary rocks that make up the Halang Formation can be the cause of the high content of magnesium in groundwater compared to other cations, which also causes groundwater in this landform to be classified as having a very high level of hardness. How does it correlate with the results of your research?
 4. It might be better if there are literatures on comparative EC and TDS values around the research area.

Actually the question of why the survey was conducted near the bend in the river is not a limitation of your research. You just have to adjust it to the topography and character of the river bank.

Dear Sehah, Hartono, Zaroh Irayani, Urip Nurwijayanto Prabowo,

Your submission "*Designing Aquifer Model in the Banks of the Serayu River, Sokawera, Somagede, Banyumas, Indonesia by Means of 1D-Electrical Resistivity Data*" (MSID:15192) for the Journal of Mathematical and Fundamental Sciences has been through the first step of copyediting, and is available for you to review by following these steps.

1. Download the attached file.
2. Make sure to turn on the "Track Changes" feature in Ms. Word. If it is enabled already, do not disable it.
3. Review and answer queries in comments. Here is the note from the copyeditor that you need to address:

Please find attached the Copy Edit version of the article. All changes can be made visible with Track changes. Changes that need extra attention are highlighted in yellow.

4. Make any copyediting changes that would further improve the text. You may change the view in Ms. Word menu Review>Tracking>Change the "All Markup" option to "No Markup". Please focus on editing the text. The format and layout will be refined after the final copyediting process.
5. Send the improved file through email to the Publication Assistant (Please change the end of the file name from "CE" to "AuthCE" to indicate the file has been edited by Author(s)).

Please note that the due date for this task will be Monday, October 11th, 2021.

This is the last opportunity to make substantial copyediting changes to the submission. The proofreading stage, which follows the preparation of the galleys, is restricted to correcting typographical and layout errors.

If you are unable to undertake this work at this time or have any questions, please contact me. Thank you for your contribution to this journal.

Alhamdulillah, penulis mengucapkan terimakasih atas koreksi dan perbaikan bahasa yang dilakukan oleh Asisten Publikasi terhadap artikel kami. Ada sedikit perubahan yang perlu penulis laporkan:

- (1) No. baris 20, penulis menambahkan kata "**groundwater**" sehingga kalimatnya menjadi "**a depth of groundwater from the water table to 27.51 m**", karena kedalaman yang dimaksud dalam kalimat tersebut adalah kedalaman air tanah yang terdapat di dalam lapisan akuifer dangkal.
- (2) No. baris 200, penulis mengganti "**Kaliori Plateau**" menjadi "**Kaliori hills**". Setelah penulis telusuri istilah "Kaliori Plateau" tidak ditemukan. Hal ini berbeda dengan Dataran Tinggi Dieng yang memang sudah nama umum. Kaliori adalah nama desa yang terletak pada topografi perbukitan (hills).
- (3) Beberapa bagian yang di-highlight kuning (no. baris 21, 200, 201), menurut penulis sudah sesuai dan tidak ada masukan dari para reviewer.
- (4) Urutan Figure 4 dan 5 setelah di-copy editing oleh Asisten Publikasi malah terjadi kekeliruan, yaitu menjadi Figure 1 dan 2.

Untuk lebih jelasnya, penulis melampirkan dua file artikel ilmiah: (1) file dari Asisten Publikasi yang telah penulis berikan tambahan perbaikan pada kolom komentar (2) file yang isinya sama dengan file pertama, namun tampilan komentar2 dan koreksi2nya telah dihilangkan.

Setelah kami mengecek naskah, kami tidak menemukan adanya kekeliruan redaksi, **kecuali** pada bagian **PUSTAKA**: (1) No. baris 334 tertulis **Simetri; Indonesian Journal of Physical Science**. Setelah kami cek di jurnal edisi cetak yang kami terima tahun 2016, nama jurnalnya adalah: **SIMETRI; Jurnal Ilmu Fisika Indonesia** (2) No. baris 371 tertulis **Journal of Neutrino**. Setelah saya cek di website resminya ternyata namanya adalah: **Jurnal NEUTRINO; Jurnal Fisika dan Aplikasinya**. Bagian-bagian tersebut sudah kami tandai warna kuning. Demikian klarifikasi dari kami.

Informasi tambahan: kami juga melampirkan Surat Izin Penggunaan Peta Geologi (online and print) dari PSG melalui email ini, meskipun kami sudah mem-forward email PSG ke email JMFS.
