Editor-in-Chief
Biodiversitas
April 24, 2016

I am pleased to submit our article entitled “Diversity of macroinvertebrate benthic as biomonitoring tools for organic pollution level in tropical river ecosystems” by Dwi Nugroho Wibowo and Setijanto for consideration for publication as a research article in Biodiversitas

In this study, we examined two biological approaches on water quality monitoring at aquatic ecosystem. The first is quantitative approach which its measurement is based upon species richness and diversity index. The second is a combination between quantitative and qualitative methods which is known as biotic index (Trent Biotic Index (TBI), Lothian’s Index, and Biotic Score)

We believe that this manuscript is appropriate for publication in the *biodiversitas* because it highlights the importance of diversity of macroinvertebrate benthic as biomonitoring tools for organic pollution level in tropical river ecosystems. This manuscript has not been published and is not under consideration for publication elsewhere. We have no conflicts of interest to disclose. All authors have read and approved the final version of the manuscript.

I submit the names of reviewers who mostly I get from reviewer of Biodiversity Journal, namely

1. [Agnieszka K. Kolada](#), Department of Freshwater Assessment Methods and Monitoring, Institute of Environmental Protection-National Research Institute. Krolewska 4, 01-692 Warsaw, Poland
2. [Iga Lewin](#), Department of Hydrobiology, Faculty of Biology and Environmental Protection, University of Silesia. 40-007 Katowice, Poland
3. [Julia Nelson](#), Faculty of Science and Natural Resources, Universiti Malaysia Sabah, Kota Kinabalu, Malaysia
4. **Mohammad Hasan Gerami**, Department of Fisheries, Faculty of Agriculture and Natural Resources, Gonbad Kavous University, Gonbad Kavous, Golestan, Iran (email: m.h.gerami@gonbad.ac.ir)
5. [Sunardi](#), Department of Biology and Institute of Ecology, Faculty of Mathematic and Natural Sciences, Universitas Padjadjaran. Jatinangor,

Kepada: Managing Editor

Dear Editor in chief Biodiversitas

Saya sampaikan dengan hormat, bahwa naskah yang pertama yang berjudul **"Diversity of macroinvertebrate benthic as biomonitoring tools for organic pollution level in tropical river ecosystems"**, berdasarkan saran reviewer antara lain

- The objectives are not clear
- The use of the indices is wrong: if the authors try to determine the status of an area it should be tested with abiotic factors (e.g. oxygen, organic matter, pollutants, quantitative pressures, etc.). However, the authors do not include such data to compare.
- The methods are inadequate: there is not reference conditions setting (which can compromise the final result) and the statistical analysis is not correct. The authors should be use of CCA analysis for relation between species and physicochemical parameters.
- Many references are out of date and for comparing objects they should use of new references.
- I'm unable to find the list of species at
- In general, the manuscript is not scientifically sound

oleh karena itu saya memperbaiki berdasar pada data yang dapat saya analisis (menyangkut hanya tiga sungai) dan penggunaan index yang sesuai. Mohon maaf atas kekurangan saya dan kiranya dapat diartikan sebagai
