Manuscript. Number.: HELIYON-D-21-04439

Title: The Cultural beliefs and practices of diabetes self-management in Javanese diabetic patients: A Qualitative Study

Journal: Heliyon

Dear Dr Sari,

Thank you for submitting your manuscript to Heliyon.

We have completed the review of your manuscript and a summary is appended below. The reviewers recommend major revisions are required before publication can be considered.

If you are able to address all reviewer comments in full, I invite you to resubmit your manuscript. We ask that you respond to each reviewer comment by either outlining how the criticism was addressed in the revised manuscript or by providing a rebuttal to the criticism. This should be carried out in a point-by-point fashion as illustrated here:

<https://www.cell.com/heliyon/guide-for-authors#Revisions>

To allow the editors and reviewers to easily assess your revised manuscript, we also ask that you upload a version of your manuscript highlighting any revisions made. You may wish to use Microsoft Word's Track Changes tool or, for LaTeX files, the latexdiff Perl script (<https://ctan.org/pkg/latexdiff>).

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/heliyon/>, and navigate to the "Submissions Needing Revision" folder. Your revision due date is Nov 16, 2021.

We understand that the COVID-19 pandemic may well be causing disruption for you and your colleagues. If that is the case for you and it has an impact on your ability to make revisions to address the concerns that came up in the review process, please reach out to us.

I look forward to receiving your revised manuscript.

Kind regards,  
Chaisiri Angkurawaranon

Editor and Reviewer comments:

please be aware that reviewer 1 has given their comments as an attachment

Reviewer 1: Methods:

Results:

Interpretation:

Other comments: please see attachment

Reviewer 2: Abstract:

1- the background section is too long. It is better to make this section shorter and expand the methodology and results

sections.

2- The first two sentences can be combined a one sentence.

3- Methods is written poorly. Please write e about study setting and period of study.

4- There is no information about two groups that were categorised in the main text. It should be written here "key informants" and "general informants".

5- Results should provide more information about different themes.

Conclusion is too long. It is better to make this section shorter and expand the methodology and results sections.

Keywords:

1- Please write "Javanese culture" instead of only "culture".

2- Please add "Indonesia".

Introduction:

1- First paragraph, lines 2-4 have been cited by reference 2. It is better to just use once. Please remove the first reference 2.

Method and design

1- It is not clear why snowball sampling was used for health workers and family member. The criteria to choose family members and health workers are not clear. Health workers are choosen form which health centre?

2- Study setting and process of recruiting patients is not clear. How did you recruited them?

3- The reason to choose health workers and family members is not clear. How they help you to get better results for this study?

4- Authors believe that to obtain a varied set of key participants, they selected them based on ...and gender. Why majority of participants (85%) are female?

5- Dividing participants to "Key participants" and "general participants" is confusing. Key participants are actually patients.

6- There is no nay information about data collection tool. What questionnaire was used? How it was developed? How about its translation process? Was it pilot tested?

7- Study procedure is not clear. How has conducted the interviews? Any bias in terms of gender differences between interviewer and interviewees as majority of participants were female? How about getting consent form for those participants who were not educated?

8- It is not clear how the authors reached the data saturation with the sample size of 47? Did they consider all three groups as whole or data is saturated for each group separately?

9- in "Data analyses", last paragraph needs references when you talked about thematic analysis.

10- How about bias in conducting interviews, collection data, emerging themes and sub-themes and interpreting results when the all authors had lived and grown up with the Javanese culture

11- Instead of using title "credibility of the study" please write "study rigorousness"

Results:

This section is written very well. There are few comments:

1- Line 1, please write "Table 1" using capital letter for T.

2- It so not clear where the results of "observation" and "field notes" were used in this section.

3- The number if quotations were used in this section is not representing on total participants.

Data in Brief (optional):

We invite you to convert your supplementary data (or a part of it) into an additional journal publication in Data in Brief, a multi-disciplinary open access journal. Data in Brief articles are a fantastic way to describe supplementary data and associated metadata, or full raw datasets deposited in an external repository, which are otherwise unnoticed. A Data in Brief article (which will be reviewed, formatted, indexed, and given a DOI) will make your data easier to find, reproduce, and cite.

You can submit to Data in Brief when you upload your revised manuscript. To do so, complete the template and follow the co-submission instructions found here: [www.elsevier.com/dib-template](http://www.elsevier.com/dib-template). If your manuscript is accepted, your Data in Brief submission will automatically be transferred to Data in Brief for editorial review and publication.

Please note: an open access Article Publication Charge (APC) is payable by the author or research funder to cover the costs associated with publication in Data in Brief and ensure your data article is immediately and permanently free to access by all. For the current APC see: [www.elsevier.com/journals/data-in-brief/2352-3409/open-access-journal](http://www.elsevier.com/journals/data-in-brief/2352-3409/open-access-journal)

### Embargo

Embargos are not automatically set for papers published in Heliyon. Papers appear online a few days after acceptance. To request a media embargo and/or publication on a specific date to assist an institutional press release, please reach out to the Heliyon team ([info@heliyon.com](mailto:info@heliyon.com)) as soon as possible and we will do our best to accommodate your request.

### Editor and Reviewer comments:

Heliyon is an online publication only, so the use of black and white images is discouraged. If you have a colour version of your figure 1, we would encourage you to use this one instead when resubmitting.

Under Additional Information please complete the author contribution statement indicating which author contributed to each section. Please note that all authors must be attributed to at least one numbered section.

Please note that all authors should have made substantial contributions to all of the following: (1) the conception and design of the study, the acquisition of data, or the analysis and interpretation of data (ie. at least one of sections 1-4 below); (2) drafting the article or critically revising its important intellectual content; (3) final approval of the version submitted. Please correct your Author Contribution Statement to follow the guidelines above, using only Heliyon's standard wording as provided:

- 1 - Conceived and designed the experiments;
- 2 - Performed the experiments;
- 3 - Analyzed and interpreted the data;
- 4 - Contributed reagents, materials, analysis tools or data;
- 5 - Wrote the paper.

Please ensure that any co-author with the contribution "Wrote the paper" has also contributed to at least one other numbered section, as drafting of the article is not sufficient contribution to justify authorship in Heliyon.
