Agus Nuryanto:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Genetically continuous populations of Striped Snakehead (*Channa striata*) in the Cingcingguling River fragmented by Sempor Reservoir".

Our decision is: Revisions Required

Reviewer A:

Review of "Genetically continuous populations of Striped Snakehead (*Channa striata*) in the Cingcingguling River fragmented by Sempor Reservoir".

I have completed my throughout review of the revised manuscript (ms) and have found the research is excellent and to be published. I also recommend the manuscript to be published in Biodiversitas Journal of Biological Diversity, but also to conservation biologists of other species who may be able to utilize similar techniques in understanding the

Agus Nuryanto:

We have reached a decision regarding your submission to Biodiversitas River fragmented by Sempor Reservoir".

Our decision is: Revisions Required

Reviewer A:

The article presents original basic research within scope of the Biodiversitas in the Cingcinggiilling River fragmented by Sempor Reservoir, Central Java

4. Line 236: The Sempor reservoir did not cause genetic fragmentation

5. Line 239: Please provide proof, data etc or supporting references

Overall, authors used clear, relatively unambiguous English language throughout

Experimental design

Research question are well defined and relevant. There is also a confusion
