Dear colleagues,

we collected information from each of the contributing parties and drafted two announcements matching the formal requirements of the journal.

Please have a final check until mid/end of next week so that the corresponding authors (Till and Harwoko) can prepare and execute the submission in reasonable time.

Thanks for your contributions and you coming feedback.

Celine and Marius

Dear All,

Please find enclosed a very little modification (with yellow highlights) from our side.

FYI, we have the deadline for submitting the final report to funding agency in **30 November 2022**, along with **the accepted article(s)** as a mandatory requirement.

Accordingly, we need your suggestion, particularly from Prof. Till F. Scaeberle.

Best regards,

Harwoko

Dear Harwoko,

thanks for the confirmation of the draft.

Well, with the report for your funding it becomes clear that – if such a scheme is followed – only if you have already preliminary results in hand to draft a publication you can embark into such a grant proposal.

Usually you should calculate half a year, once all results are available, to write a publication, submit it and get it to the status “accepted”.

How was your planning for a publication beforehand? (You do not have to answer here, but rather ask yourself)

I would be totally ok to submit the drafts of the genome announcements with your final report. (Remember, the wet lab experiments to get these manuscripts had been produced by Riyanti during her time in Giessen...quite a while ago)

You have to communicate with your funding agency that it is submitted – I believe this we can achieve within this time frame – and the evaluation process is ongoing.

Maybe a further publication is planned...but let us wait for the results.

Dear Harwoko,

Attached both manuscripts as submitted to the journal (as PDF).

I also made a small mistake when entering your department. I am really sorry! However If you log into your account, that has automatically been made when I added you as author, you can change your department from Faculty of Fisheries and Marine Science to Department of pharmacy. If you need any help, please let me know, I just did the whole process for myself.

Viele Grüße,

Celine

MRA01268-22: Manuscript Received

1 message

mrajournal@msubmit.net <mrajournal@msubmit.net>
Reply-To: dsmith@asmusa.org, mraasmusa@gmail.com
To: harwoko.unsoed@gmail.com

Wed, Nov 30, 2022 at 8:54 PM

Dear Dr. Harwoko,

On November 30, 2022, we received the manuscript "Draft Genome Sequence of Sinomicrobium sp. PAP.21, Isolated from a Coast Sample of Papua, Indonesia" by Riyanti Riyanti, Celine Zumkeller, Marius Spohn, Sanja Mihajlovic, Oliver Schwengers, Alexander Goesmann, Riviani Riviani, Maria Meinita, Till Schäberle, and Harwoko Harwoko. The submission form indicates that this paper should be processed as a(n) Announcement intended for publication in the section Genome Sequences.

The manuscript has been assigned the control number MRA01268-22. Take note of this number, and refer to it in any correspondence with the Journals Department or with the editor.

You can check the status of this manuscript by clicking on the link below and selecting Check Status:

<https://mra.msubmit.net/cgi-bin/main.plex?el=A1Nv4CFPv2A5FeVB7F4A9ftd64YQsXx8aYTcGEG8Z5ifAZ>

Per ASM policy, data must be made publicly available before the submission will be considered for publication. If you have not already done so, please contact the appropriate database and request immediate release of the data.

All authors must disclose any commercial affiliations as well as consultancies, stock or equity interests, and patent-licensing arrangements that could be considered to pose a conflict of interest regarding the submitted manuscript. All funding sources for the project, institutional and corporate, and any potentially conflicting interests, such as relationships that might detract from an author's objectivity in presentation of study results, must be acknowledged, both in the Acknowledgments section and on this form. The corresponding author must review this policy with all coauthors.

The author submitting the manuscript must state in the submission form whether or not any of the authors has a conflict of interest. Here is how Prof. Schäberle responded:

Conflict of Interest: No conflict of interest.

If you have a conflict of interest that is not disclosed here, please notify the journal staff immediately at dsmith@asmusa.org.

In submitting your manuscript to MRA, the author(s) guarantees that a manuscript with substantially the same content has not been submitted or published elsewhere and that all of the authors are aware of and agree to the submission.

By publishing in the journal, the authors agree that any DNAs, viruses, microbial strains, mutant animal strains, cell lines, antibodies, and similar materials newly described in the article are available from a national collection or will be made available in a timely fashion, at reasonable cost, and in limited quantities to members of the scientific community for noncommercial purposes. The authors guarantee that they have the authority to comply with this policy either directly or by means of material transfer agreements through the owner.

Similarly, the authors agree to make available computer programs, originating in the authors' laboratory, that are the only means of confirming the conclusions reported in the article but that are not available commercially. The program(s) and suitable documentation regarding its (their) use may be provided by any of the following means: (i) as a program transmitted via the Internet, (ii) as an Internet server-based tool, or (iii) as a compiled or assembled form on a suitable medium (e.g., magnetic or optical). It is expected that the material will be provided in a timely fashion and at reasonable cost to members of the scientific community for noncommercial purposes. The authors guarantee that they have the authority to comply with this policy either directly or by means of material transfer agreements through the owner.

As an open-access publication, MRA receives no financial support from paid subscriptions and depends on authors' prompt payment of publication fees as soon as their articles are accepted. You will be contacted separately about payment when the proofs are issued; please follow the instructions in that e-mail. Arrangements for payment must be made before your article is published. For a complete list of **Publication Fees**, please visit our [website](#).

Corresponding authors may [join or renew ASM membership](#) to obtain discounts on publication fees. Need to upgrade your membership level? Please contact Customer Service at Service@asmusa.org.

Submitting authors can optionally assign CRediT roles within the manuscript submission system at the time of submission. **If CRediT roles have been assigned within the system, those roles are listed for all authors at the end of this message.** The roles will be present only in the XML of the manuscript if it is accepted and published.

Thank you for submitting your work to Microbiology Resource Announcements.

Regards,
MRA staff

CRediT roles

Re: MRA01268-22 (Draft Genome Sequence of Sinomicrobium sp. PAP.21, Isolated from a Coast Sample of Papua, Indonesia)

Dear Prof. Schäberle:

Thank you for your submission to MRA. Your manuscript has been reviewed by two senior editors, whose comments are below. On the basis of these comments, I am inviting you to submit a revised manuscript that addresses all reviewer concerns.

To submit your modified manuscript, log onto the eJP submission site at <https://mra.msubmit.net/cgi-bin/main.plex>. If you cannot remember your password, click the "Can't remember your password?" link and follow the instructions on the screen. Go to Author Tasks and click the appropriate manuscript title to begin the resubmission process. The

information that you entered when you first submitted the paper will be displayed. Please update the information as necessary.

ASM policy requires that data be available to the public upon online posting of the article, so please verify all links to sequence records, if present, and make sure that each number retrieves the full record of the data. If a new accession number is not linked or a link is broken, provide production staff with the correct URL for the record. If the accession numbers for new data are not publicly accessible before the expected online posting of the article, publication of your article may be delayed; please contact the ASM production staff immediately with the expected release date.

Please return the manuscript within 60 days; if you cannot complete the modification within this time period, please contact me. If you do not wish to modify the manuscript and prefer to submit it to another journal, please notify me of your decision immediately so that the manuscript may be formally withdrawn from consideration by Microbiology Resource Announcements (MRA).

To avoid unnecessary delay in publication should your modified manuscript be accepted, it is important that you upload all of your native files (i.e., not a single PDF) and that all elements meet the technical requirements for production. A point-by-point Revision Response file is required, as well as a compare copy with changes highlighted uploaded as a file type Marked Up Manuscript.

As an open-access publication, MRA receives no financial support from paid subscriptions and depends on authors' prompt payment of publication fees as soon as their articles are accepted. You will be contacted separately about payment when the proofs are issued; please follow the instructions in that e-mail. Arrangements for payment must be made before your article is published. For a complete list of **Publication Fees**, please visit our [website](#).

Corresponding authors may [join or renew ASM membership](#) to obtain discounts on publication fees. Need to upgrade your membership level? Please contact Customer Service at Service@asmusa.org.

Thank you for submitting your paper to MRA.

Sincerely,
Dr. Frank Stewart

Reviewer Comments:

Reviewer 1:

If possible, please provide a lat/long for the collection site, as well as brief details about the sample collection. What depth in sediment? Etc.

Please provide coverage estimates for the contigs.

Data Availability section: Please provide a direct link to the raw data in SRA.

Reviewer 2:

General: for all software be sure to provide citations, if they are available.

Please specify if any option/parameters were used for the different software tools used, or indicate "default parameters" otherwise. This can be done in a single statement , e.g. "All tools were run with default parameters unless otherwise specified".

L34-35: Please provide more precise location details, including depth of sample collected. The Cenderawasih Bay National Park is quite large and has a long coastline.

L37: Please provide a reference or details on the media used for isolation and growth.

L53: Please provide the actual dDDH value calculated.

L67: Please provide a reference for BigScape and make sure that the abbreviation corresponds to the one in the text "BiG-SCAPE" (L56-57)

Figure legend: Please provide an explanation for color coding, particularly in the pinensin cluster.

Dear Dr. Harwoko,

On February 21, 2023, we received the manuscript "Draft Genome Sequence of Sinomicrobium sp. PAP.21, Isolated from a Coast Sample of Papua, Indonesia" by Riyanti Riyanti, Celine Zumkeller, Marius Spohn, Sanja Mihajlovic, Oliver Schwengers, Alexander Goesmann, Riviani Riviani, Maria Meinita, Till Schäberle, and Harwoko Harwoko. The submission form indicates that this paper should be processed as a(n) Announcement intended for publication in the section Genome Sequences.

The manuscript has been assigned the control number MRA01268-22R1. Take note of this number, and refer to it in any correspondence with the Journals Department or with the editor.

You can check the status of this manuscript by clicking on the link below and selecting Check Status:

<https://mra.msubmit.net/cgi-bin/main.plex?el=A2Nv3CFPv4B6FeVB6F4A9ftd64YQsXx8aYTcGEG8Z5ifAZ>

Per ASM policy, data must be made publicly available before the submission will be considered for publication. If you have not already done so, please contact the appropriate database and request immediate release of the data.

All authors must disclose any commercial affiliations as well as consultancies, stock or equity interests, and patent-licensing arrangements that could be considered to pose a conflict of interest regarding the submitted manuscript. All funding sources for the project, institutional and corporate, and any potentially conflicting interests, such as relationships that might detract from an author's objectivity in presentation of study results, must be acknowledged, both in the Acknowledgments section and on this form. The corresponding author must review this policy with all coauthors.

The author submitting the manuscript must state in the submission form whether or not any of the authors has a conflict of interest. Here is how Prof. Schäberle responded:

Conflict of Interest: No conflict of interest.

If you have a conflict of interest that is not disclosed here, please notify the journal staff immediately at dsmith@asmusa.org.

In submitting your manuscript to MRA, the author(s) guarantees that a manuscript with substantially the same content has not been submitted or published elsewhere and that all of the authors are aware of and agree to the submission.

By publishing in the journal, the authors agree that any DNAs, viruses, microbial strains, mutant animal strains, cell lines, antibodies, and similar materials newly described in the article are available from a national collection or will be made available in a timely fashion, at reasonable cost, and in limited quantities to members of the scientific community for noncommercial purposes. The authors guarantee that they have the authority to comply with this policy either directly or by means of material transfer agreements through the owner.

Similarly, the authors agree to make available computer programs, originating in the authors' laboratory, that are the only means of confirming the conclusions reported in the article but that are not available commercially. The program(s) and suitable documentation regarding its (their) use may be provided by any of the following means: (i) as a program transmitted via the Internet, (ii) as an Internet server-based tool, or (iii) as a compiled or assembled form on a suitable medium (e.g., magnetic or optical). It is expected that the material will be provided in a timely fashion and at reasonable cost to members of the scientific community for noncommercial purposes. The authors guarantee that they have the authority to comply with this policy either directly or by means of material transfer agreements through the owner.

As an open-access publication, MRA receives no financial support from paid subscriptions and depends on authors' prompt payment of publication fees as soon as their articles are accepted. You will be contacted separately about payment when the proofs are issued; please follow the instructions in that e-mail. Arrangements for payment must be made before your article is published. For a complete list of **Publication Fees**, please visit our [website](#).

Corresponding authors may [join or renew ASM membership](#) to obtain discounts on publication fees. Need to upgrade your membership level? Please contact Customer Service at Service@asmusa.org.

Submitting authors can optionally assign CRediT roles within the manuscript submission system at the time of submission. **If CRediT roles have been assigned within the system, those roles are listed for all authors at the end of this message.** The roles will be present only in the XML of the manuscript if it is accepted and published.

Thank you for submitting your work to Microbiology Resource Announcements.

Regards,
MRA staff

CRediT roles

Dear Dr. Harwoko:

Here is a copy of the decision letter for manuscript "Draft Genome Sequence of Sinomicrobium sp. PAP.21, Isolated from a Coast Sample of Papua, Indonesia" by Riyanti Riyanti, Celine Zumkeller, Marius Spohn, Sanja Mihajlovic, Oliver Schwengers, Alexander Goesmann, Riviani Riviani, Maria Meinita, Till Schäberle, and Harwoko Harwoko (MRA01268-22R1), for which you were a contributing author.

Sincerely,

Frank Stewart

Re: MRA01268-22R1 (Draft Genome Sequence of Sinomicrobium sp. PAP.21, Isolated from a Coast Sample of Papua, Indonesia)

Dear Prof. Schäberle:

Thank you for your careful attention to the reviewer comments.

Your manuscript has been accepted, and I am forwarding it to the ASM Journals Department for publication in Microbiology Resource Announcements (MRA). For your reference, ASM Journals' address is given below. Before it can be scheduled for publication, your manuscript must be checked by ASM production staff to make sure that all elements meet the technical requirements for publication. ASM staff will contact you if anything needs to be revised before copyediting and production can begin. Otherwise,

you will be notified when your proofs are ready to be viewed.

ASM policy requires that data be available to the public upon online posting of the article, so please verify all links to sequence records, if present, and make sure that each number retrieves the full record of the data. If a new accession number is not linked or a link is broken, provide production staff with the correct URL for the record. If the accession numbers for new data are not publicly accessible before the expected online posting of the article, publication of your article may be delayed; please contact the ASM production staff immediately with the expected release date.

Publication Fees: We have partnered with Copyright Clearance Center to collect author charges. You will soon receive a message from no-reply@copyright.com with further instructions. For questions related to paying charges through RightsLink, please contact Copyright Clearance Center by email at ASM_Support@copyright.com or toll free at +1.877.622.5543. Hours of operation: 24 hours per day, 7 days per week. Copyright Clearance Center makes every attempt to respond to all emails within 24 hours. For a complete list of **Publication Fees**, including supplemental material costs, please visit our <https://journals.asm.org/publication-fees> target="blank">website.

Corresponding authors may [join or renew ASM membership](#) to obtain discounts on publication fees. Need to upgrade your membership level? Please contact Customer Service at Service@asmusa.org.

Thank you for submitting your paper to MRA.

Sincerely,
Dr. Frank Stewart
