ENDANG HILMI:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Distribution and diversity of mangrove tannin in Segara Anakan Lagoon (Indonesia): their potentials for sustainable aquatic ecosystem services".

Our decision is: Revisions Required

-----  
Reviewer A:

Dear Editor and Author,

Please find attached is the reviews and suggested edits for the manuscript entitled "Distribution and diversity of mangrove tannin in Segara Anakan Lagoon (Indonesia): their potentials for sustainable aquatic ecosystem services".

In general this is an interesting paper with extensive data collection works in the field and in the laboratory. Although the research idea is not new, there are lots of results presented which might add information in new context of study area, i.e., Segara Anakan which is recognized as an important mangrove ecosystem remaining in Java Island. Nonetheless, the manuscript is poorly written with English language that is often hard to understand. As such, I made lots of suggested edits to improve the clarity of the manuscript. Among others are:

1. Title: Previous version of the title is too long and confusing. I would suggest to modify the title to be more concise and clear as suggested here.
2. Abstract: Lots modifications required as suggested. Also, it is not the standard format of the journal of using points (e.g., i, ii, iii,... ) to describe the results in the Abstract. Instead, I would suggest to put as an ordinary sentence such as suggested here.
3. Introduction: I would suggest to develop the Introduction starting from a more general issue (e.g., mangrove and its functions) then move into the explanation of tannin, then move into the issues of interlinkage between mangrove and tannin then arrive on the aim and context of research. Therefore, it is easy for readers to understand the flow of the text, from generalization into context-specific case.
4. Introduction: In the last paragraph of the Introduction, I would expect statements expressing the aim and importance/contribution of the paper. And these sentences are largely irrelevant with such points, as such I would suggest to replace these sentences with ones that I added above. Please check the references that were omitted and update the reference list/bibliography accordingly.
5. Results and Discussions: it requires re-wordings on the section/sub-heading and re-arrangement of the tables and figures to follow the results and discussion accordingly as suggested in the document.
6. It is not clear what you want to say here regarding mangrove landscaping since there is no Figure 5 to refer to (also there is not Figure 4 as well). Please clarify what are talking about and add the respective figure(s) to make it clearer.

Detailed comments are attached in the file.

Best regards,

Reviewer

Recommendation: Resubmit for Review

The editing of your submission, "Tannins in mangrove plants in Segara Anakan Lagoon, Central Java, Indonesia ," is complete. We are now sending it to production.

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/8862>

The screenshot displays the Smujo Editor Decision interface. The top navigation bar includes the Smujo logo, the user's name 'endanghilmi27', and a 'Help' button. The main content area is titled 'Submissions' and features a 'My Queue' tab and an 'Archives' tab with a count of 2. The 'Archives' tab is active, showing a list of 'Archived Submissions'. The list contains two entries, both published by Hilmi et al. The first entry, ID 8862, is titled 'Tannins in mangrove plants in Segara Anakan Lagoon, Central Java, Indonesia' and has a 'Published' status. The second entry, ID 8696, is titled 'The affinity of mangrove species using Association and Cluster Index in North Coast of Jakarta and Segara Anakan of Cilacap, Indonesia' and also has a 'Published' status. The interface includes a search bar and a 'New Submission' button. The bottom of the screen shows a Windows taskbar with various application icons and the system clock indicating 18:59 on 11/08/2021.
