to me

Dear endang hilmi,

Thank you for submitting the manuscript, "The Community Structure and Mangrove Landscape following Soil Properties and Water Inundation Distribution in Segara Anakan Cilacap: community structure and Mangrove Landscape " to Jurnal Manajemen Hutan Tropika.

From now on, I will do a rapid review for formatting and writing style checking. After pass this process, the Board Editor of Jurnal Manajemen Hutan Tropika will decide the suitability of your manuscript with our standard (this process may take 1 week).

If your manuscript is in line with our standard I will contact suitable reviewer who are acknowledged experts in the field. Once a reviewer agrees to review your manuscript I will directly send your manuscript for review (this stage may take around 1 month). After I have received the required number of the expert reviews, I will make decision on your manuscript.

To track the status of your manuscript, please log into:
<http://journal.ipb.ac.id/index.php/jmht/>

If you have any questions, please contact me.

Thank you for considering this journal as a venue for your work.

Kind regards,

Dr. Efi Yuliati Yovi

Dear Author(s),

Thank you for submitting the paper. Before being forwarded to the reviewer, please clarify the following matters:

1. The meaning of "community structure" in this study. Understanding community structure in different fields of science is different.
2. The logical relationship between title, background, research question (hypothesis), and research objectives. We do not capture any problem formulations or research questions concerning the research objectives.
3. Benefits of knowing species distribution, biodiversity, environment factors, and mangrove zoning.

We are waiting for your immediate response.

Thank you,

Regard,

Section Editor

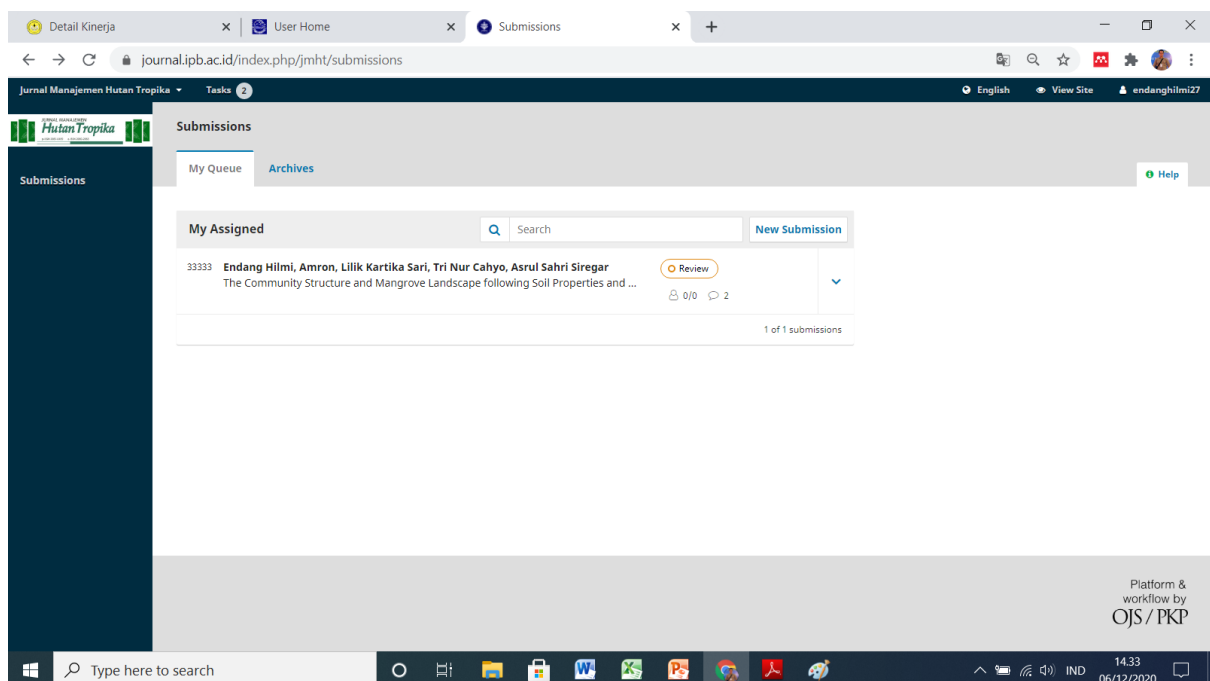

Author Clarification

1. The community structure in a mangrove ecosystem may be different from forest management and forest inventories. The community structure in mangrove ecology discusses the distribution of species, diameter distribution, density distribution, mangrove zoning. This paper emphasizes the abnormal conditions of the mangrove ecosystem in Segara Anakan, such as high pollution and high sedimentation. These factors cause damage to the mangrove ecosystem, mismatch of mangrove zones and others. So basically in many mangrove ecosystems in Indonesia, the community structure and zoning are not clear. However, if the title has to be changed then I will remove the word community structure and be replaced by mangrove zone. But, if i remove the community structure, i lossing the data and discussing of the structure of mangrove ecosystem.
2. This paper concern to analysis the abnormal condition of mangrove ecosystem is showed by mangrove ecosystem in Segara Anakan. The abnormal condition as consequence of enviromental degradation like as high sedimentation, high pollution and exploitation which caused the mangrove degradation, unnormal of mangrove zonation and low density. The model of mangrove landscape showed the pattern of adaptation species in mangrove landscape.
3. This paper share many condition of mangrove landscape,enviroment problem, and mangrove degradation in Segara Ankan

But I will improve the title, the objective and the discussing

Thanks alot

Endang Hilmi

to me, Amron, Lilik, Tri, Asrul

Dear Endang Hilmi, Amron, Lilik Kartika Sari, Tri Nur Cahyo, Asrul Sahri Siregar,

Greeting and good day,

Thank you for submitting your scientific manuscript to Jurnal Manajemen Hutan Tropika.

I have reached a decision regarding your submission of "The Mangrove Landscape and Zonation following Soil Properties and Water Inundation Distribution in Segara Anakan Cilacap: The Mangrove Landscape and Zonation".

Our decision is to: **Revisions Required**

Please see the result in the attached file.

You need to revise the manuscript as per the attached file. Give detail and clear answer and comment to each reviewer's comments and address each response to each reviewer. Please use the [Response to Reviewer Form](#). Activate the track changes facility during the revision process, otherwise, JMHT will reject your revision. See the example [here](#).

After the manuscript meets the JMHT standard, please upload your manuscript into:
<http://journal.ipb.ac.id/index.php/jmht/>

Should there any questions, please let me know by using this discussion facility.

Do not send your revision as a new submission. Please use the same username and password as you registered previously.

Thank you,

Dr. Efi Yulianti Yovi
Editor in Chief

EVALUATION SHEET

Title:

Comments for the author

1. Is the title of the paper useful and appropriate?
It is recommended to changed the title to be: Mangrove Zonation and Its Trigerred Environmental Factors in Segara Anakan Cilacap.
2. Is the description of methods adequate for replication by others (if not a standard method)?
Yes, it is .
3. Are all the tables and figures self-explanatory and necessary?
Figures 4,5, and 6 should be showed on the Tables. Table 3 should be showed on a histogram.

4. Is the discussion adequate?

It needs improving discussion massively between vegetation structure and species composition and its environmental factors.

5. Are there any important publications on the topic that the authors have missed?

There are some researches in Cilacap mangroves that had been published at reputed international journals that can be cited.

6. Are there any evident errors?

No

7. If the paper can be shortened, can you recommend which part(s) to be deleted or shortened?

The substance relating to mangrove distribution trend as well as mangrove landscape should be excluded, the paper should be focused on mangrove zonation and its environmental factors in controlling its zonation.

8. Can you comment on the scientific originality and usefulness of the paper?

The data are original and useful to explain the mangrove zonation

9. Decision upon review is:

- Not worthy for publication in the Jurnal Manajemen Hutan Tropika
- **Worthy for publication with major revisions and I would like to get the revised version from the authors.**
- Worthy for publication with major revisions and it is not necessary to send me the revised version (board editor may handle it)
- Worthy for publication with minor revisions and I would like to get the revised version from the authors.
- Worthy for publication with minor revisions and it is not necessary to send me the revised version (board editor may handle it)
- Worthy for publication without revision

10. Additional comments for the author

1. The paper should be focused on mangrove zonation and its controlling environmental factors, so the discussion should be massively focused between them.

2. The prediction of mangrove distribution area in the research is the other research topic, please excluded from the paper topic.

3. Carefully with the formatting/editing, especially with the accuracy of the typing

Dear Endang Hilmi, Amron, Lilik Kartika Sari, Tri Nur Cahyo, Asrul Sahri Siregar,

Greeting and good day,

Thank you for submitting your scientific manuscript to Jurnal Manajemen Hutan Tropika.

I have reached a decision regarding your submission of "The Mangrove Landscape and Zonation following Soil Properties and Water Inundation Distribution in Segara Anakan Cilacap: The Mangrove Landscape and Zonation".

Our decision is to: **Revisions Required**

Please see the result in the attached file.

You need to revise the manuscript as per the attached file. Give detail and clear answer and comment to each reviewer's comments and address each response to each reviewer. Please use the [Response to Reviewer Form](#). Activate the track changes facility during the revision process, otherwise, JMHT will reject your revision. See the example [here](#). We also found serious issues in writing style and language problems. To make you able to catch the deadline for August Edition, please make the revision as perfect as possible, so it will not stay too long in the editing stage, which usually make a delay in the publication.

After the manuscript meets the JMHT standard, please upload your manuscript into:
<http://journal.ipb.ac.id/index.php/jmht/>

I hope to get your revision at least 10 days from today, which means 24 July at the latest.

Should there any questions, please let me know by using this discussion facility.

Do not send your revision as a new submission. Please use the same username and password as you registered previously.

Kind regards,

Dr. Efi Yuliati Yovi

Dear Authors,
Terlampir disampaikan hasil copyediting artikel berjudul "The Mangrove Landscape and Zonation Following Soil Properties and Water Inundation Distribution in Segara Anakan Cilacap". Kami mohon agar dapat dilakukan perbaikan berdasarkan komentar pada file artikel tersebut. Kami mohon agar fasilitas track changes diaktifkan agar memudahkan pengecekan.
Terima kasih.
Regards,
Priyanto

Dear Pak Endang Hilmi et al.,

Your submission "The Mangrove Landscape and Zonation Following Soil Properties and V Distribution in Segara Anakan Cilacap" to Jurnal Manajemen Hutan Tropika now needs to find the file in galley.

We hope that we can receive your proofread within 3 days for further processing.

For your information, you only allow to mentioned the revision/comment (if necessary) thr listing the revision according to the page and rows of the galley, let us know the previous a form. We have a note that *Table 4 is not mentioned in the manuscript*.

Regards,

Priyanto
