to me

Endang Hilmi:

Thank you for submitting the manuscript, "Adaptation and Living Trees of Mangrove Seedling in Planting System of Vertical and Horizontal Aquaponic Reducing Water Inundation Impact (A Case Study in North Coast Jakarta)" to Biodiversitas Journal of Biological Diversity. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/10263>

Username: endanghilmi27

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Ahmad Dwi Setyawan

You have a new notification from Biodiversitas Journal of Biological Diversity:

There is new activity in the discussion titled "revised 2. manuscript water inundation" regarding the submission "Adaptation and Living Trees of Mangrove Seedling in Planting System of Vertical and Horizontal Aquaponic Reducing Water Inundation Impact (A Case Study in North Coast Jakarta)".

Link: <https://smujo.id/biodiv/authorDashboard/submission/10263>

Ahmad Dwi Setyawan

Endang Hilmi, LK Sari, TN. Cahyo, TN. Cahyo, RPC. Pertiwi, A. Mahdiana, T. Junaidi:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "The Adaptation and Survival Rate of Mangrove Vegetation (Life Percent and Growth) in Vertical and Horizontal Aquaponic Systems to Reduce the Impact of Water Inundation (Case Study in North Coast Jakarta)".

Our decision is: Revisions Required

-----  
Reviewer A:

Dear Editor,

Please find attached is the reviews and suggested edits for the manuscript entitled "The Adaptation and Survival Rate of Mangrove Vegetation (Life Percent and Growth) in Vertical and Horizontal Aquaponic Systems to Reduce the Impact of Water Inundation (Case Study in North Coast Jakarta)".

Despite the simple writing and analysis, this paper has important contribution in the management and practical aspects on the mangrove rehabilitation efforts. Especially, I appreciate the authors regarding the technical efforts on the ground in building the planting media (bamboos, soil, seedlings, etc), which I believe it was very complicated logistically.

To strengthen and sell the paper, I suggest to edit the structure and language as provided in the attached file. Some issues to resolve include:

- 1. The title is too long. I would suggest to modify the title something around this to be more concise and clear.*
- 2. The structure and language of the Abstract and Introduction is hard to follow, thus I would suggest to re-arrange the paragraphs and sentences as provided here.*
- 3. When first mentioned species for the first time in the text, Please provide the complete latin name for the species.*
4. Methods, Please be consistent when naming the studied site to avoid confusion.
5. Figure 1, Please note that not all readers are familiar with the study area. Thus, I would suggest to add an inset map showing Indonesia or Java Island, and locate where the study site is. Also, there is wrong vocab in the figure which said Reserach site. Please correct it.

6. Throughout the text, please be consistent when expressing decimals vs thousands, whether using dot point vs comma. I would suggest to use dot point when expressing decimals and vice versa to accord with common standard in international journals.

7. Instead of being put in the table, I would suggest to put the information regarding the cost in the main text.

Best regards,

Reviewer

Recommendation: Revisions Required
