The screenshot displays the author dashboard for the Baghdad Science Journal. The browser address bar shows the URL: bsj.uobaghdad.edu.iq/index.php/BSJ/authorDashboard/submission/7455. The dashboard has a dark blue sidebar with the journal name and a 'Tasks' section. The main content area has tabs for 'Submission', 'Review', 'Copyediting', and 'Production'. Under the 'Submission' tab, there is a 'Submission Files' section with a search icon. It lists three files:

ID	File Name	Date	Type
54743-1	endanghilmi27, BSJ_Manuscript_mercury contaminant.docx	May 26, 2022	Article Text
55155-1	jowankh, 7455 plagiarism report.pdf	June 3, 2022	Similarity index report (only for journal staff use)
55221-1	fmrhassan, 7455-for reviewers.docx	June 4, 2022	Article Text

Below the files is a 'Download All Files' button. The 'Pre-Review Discussions' section has an 'Add discussion' button. It shows a table with one entry:

Name	From	Last Reply	Replies	Closed
Comments for the Editor	endanghilmi27 2022-05-26 05:26 AM	-	0	<input type="checkbox"/>

The Windows taskbar at the bottom shows the time as 19:25 on 05/06/2022. Open files in the background include '7455-Article Text...docx' and '7455-Similarity ind...pdf'.

Reviewer Comments

Title: The ecological risk assessment of mangrove ecosystem using bioaccumulation and translocation of mercury contaminants in Segara Anakan Cilacap

This is an interesting article provides a great contribution to risk assessment and mobilization of trace metals in mangrove ecosystem subjected to mercury contamination. Using mangrove tissues, water and sediments as bioindicators to monitor metal pollution and follow pollutant's pathway and accumulation in living cells is the core of this study.

The paper was well written though some comments should be made to improve this manuscript:

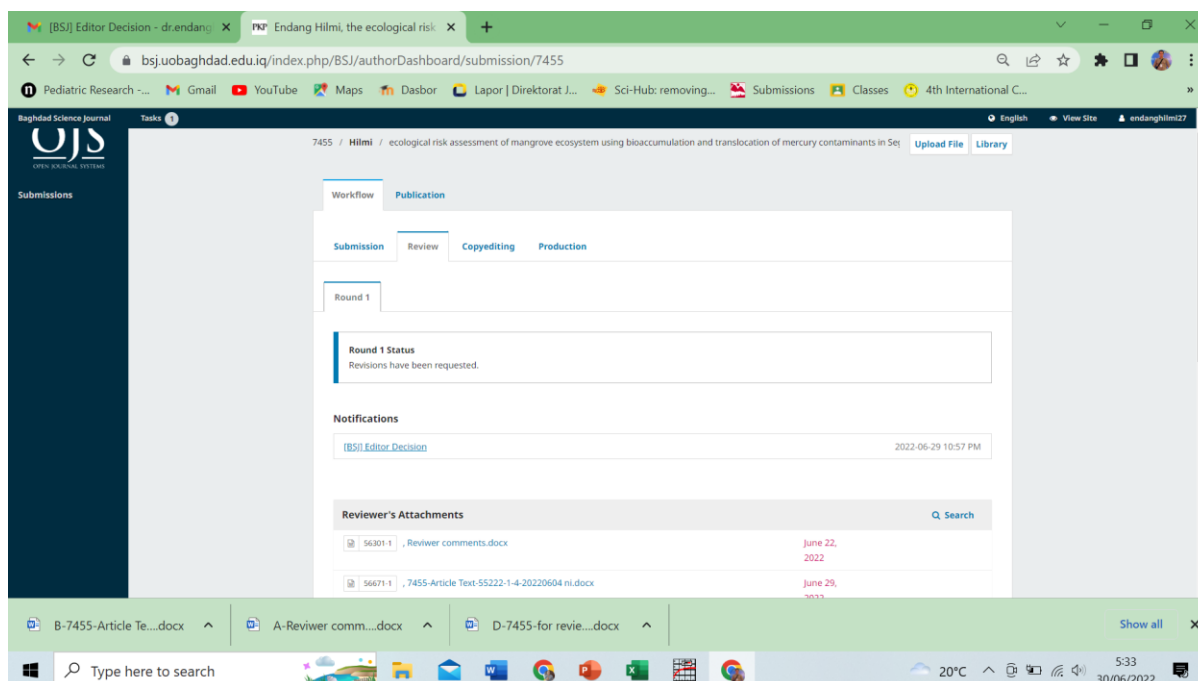

- 1- In the title country of study should be added
- 2- I have a little confusion in abstract; there are some values need to be clarified.

0137 or 0.137

- 3- The Collected plants, water and sediment are they from same sampling sites? clarify
- 4- Which mangrove's roots were collected, is it the actual roots beneath the sediment or the respiratory roots?
- 5- In order to confirm the status of pollution, they should be compared with local and international standard's values and permitted levels of mercury? Please add it

- 6- The discussion was too short, the author should elaborate more about the status of mercury elsewhere in the same country and identify the real sources for contamination to provide clear proven to the decision maker to act accordingly.
- 7- There are few typo mistakes and so many unnecessary spaces, so proofreading is required.
- 8- Reference [12] is missing from the text, add it or remove it

Although only one metal was monitored in this study, I recommend this paper for publication with minor corrections as shown in above.

Endang Hilmi:

We have reached a decision regarding your submission to Baghdad Science Journal, "the ecological risk assessment of mangrove ecosystem using bioaccumulation and translocation of mercury contaminants in Segara Anakan Cila: Ecological risk assesment of mercury contaminant".

Our decision is: Revisions Required

Please, use the form of author response, you can find it on the journal website

Reviewer A:

Recommendation: Accept Submission

R2: needs revision

Reviewer C:

Recommendation: Major Revision

4- Is the abstract (in any) representative of the content of the manuscript?

*** The abstract need to be totally re-written**

5- Is the subject clearly and logically presented?

*** the whole paper need major re-writing to achieve the essentials of scientific writing formats**

6- Are the interpretations justified?

*** interpretations are not satisfactory**

7- Has the scientific names (for biology article) been correctly applied in nomenclature decisions? Or chemical nomenclature (please, follow this link: <https://iupac.org/>).

*** some names/nomenclature need to be corrected and unified for the whole document**

8- Are the discussion and conclusions supported by the results?

*** major re-editing is required. The presentation of results is so messy and I suggest using table instead of putting numbers between the lines that will not explain the case clearly. Also, the conclusion is not satisfactory and need to be more reflective for the findings**

9- Is the literature cited an appropriate and comprehensive?

*** Too many citations without rational justification**

10- Are the tables and figures clear, all necessary, and well labeled?

*** neither the tables nor the figures have unique style..some mess and mix between them...re-edit**

11- Should some parts of the manuscript be modified, expanded, or omitted?

*** The whole document need major re-edit in style and also English proofreading as it is written in so weak language**

12- Is the total length of the manuscript in keeping with its content?

*** the re-edit should produce shorter and more clearly presented results**

Dear Author,

fmhassan

The reviewer needs the following:

2022-08-01

09:30 PM

"Authors need to read my comments in parentheses. Also write up should be in times new Roman, 12 pts, 20 pages followed by tables, list of figure legends, and then figures + only figure numbers"

Please, make all the corrections (see the attached file) point by point and marked in red .

Regards

Note

Dear Hilmi,

Please, upload a new file of your manscrip (see the attached file) to pass it into copyediting process, and correct writting the reference as the journal style:

While writing the references, the name of the research, as well as the name of the journal, must be written in an abbreviated form.

The names of the researchers mentioned in the references during writing must be adhered to as follows:

Petitti DB, Crooks VC, Buckwalter JG, Chiu V. Blood pressure levels before dementia. Arch Neurol. 2005 Jan;62(1):112-6.

1-There is no point separator between one researcher and another

2- There is no point between the details of the name of the researcher

3- The name of the research begins with a dot and ends with a dot, then an abbreviation for the name of the journal, then a dot

Note

4- Publication year without parentheses

5- After the year of publication, a point sorter

6- It is not permissible to mention more than six researchers and the seventh and above we mention the word et al and there is no word and among the names of the researchers

* Kindly add at least two references from our journal

Regards

Editor
