**[biodiv] Editor Decision**

2020-08-04 11:09 PM

Loekas Soesanto, Annisa Rahmaddila Rizky Hartono, Endang Mugiasuti, Heri Widarta, Heri Widarta:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Seed-borne pathogenic fungi on some soybean varieties".

Our decision is: Revisions Required

Smujo Editors
editors@smujo.id

Reviewer A:

1. The identity of the fungus is written in sentences. It would be better to write it as a table form.
2. Please use agar plate instead of PDA, PDA is not the method it is the media used for the isolation.
3. Picture of *cladosporium* was not in the paper.
4. The measurement of any conidia was not written in the paper. Write their length and width.
5. Why you wrote references in the pictures of fungi. This shows that these pictures were not taken by you. Omit the references from the pictures.
6. Please attach only those images which were taken by you. a) colony of fungus b) conidia at magnification. That's it. Don't use others pictures.
7. Please write the description of *Colletotrichum*. There is only 7 headings of fungi
8. Omit unused references from references section. When you remove some references from the description of fungi, they must also be removed from the reference section.
9. Please read paper very carefully and if possible, write the description of the fungus as a table.
10. Did any method used for seed germination. By what method did you see seed germination?
