1st International Conference on Tropical Agriculture (ICTA) 2016 Using Causal Loop Diagram as a Qualitative Instrument to Model Smallholders: A Case Study of Goat Farming in Gumelar - Banyumas Novie Andri Setianto and Nunung Noor Hidayat Faculty of Animal Science, Jenderal Soedirman University, Jln. dr. Suparno Karangwangkal Purwokerto, 53123, Indonesia Abstract Improving smallholder performance remains a seemingly intractable central issue for livestock development in Indonesia. In terms of productivity, smallholder tends to have poor performance. Studying a complex system such as smallholder goat farming requires a systems thinking approach. The objective of this article was to devise an approach that
